ServiceNow | Jira | Power BI |Power Query | DAX | Microsoft 365 | Microsoft Copilot | Google Workspace | SharePoint | Microsoft Azure Portal | Microsoft Entra ID | SQL Server | Python | Role-Based Access Control (RBAC) | GitHub | Slack

## PROFESSIONAL EXPERIENCE

**TECHNICAL SUPPORT ADVISOR | VXI Global Solutions | Jacksonville, FL | Remote** May 2026 – Present

*Supporting customers for a Fortune 10 global technology company in a high-volume technical support environment*.

- Troubleshoot hardware, software, account, connectivity, and device-related issues while guiding enterprise and consumer customers through clear, step-by-step resolutions.
- Achieve **an 82% issue resolution rate**, exceeding the 75% team benchmark by efficiently diagnosing and closing high volume technical cases.
- **Ranked # 1 on the team for CSAT**, consistently delivering exceptional customer satisfaction while efficiently diagnosing and closing high-volume technical cases.
- Own customer issues through resolution or escalation, documenting troubleshooting steps, identifying unresolved dependencies, and providing clear context to support effective handoffs.
- Educate customers on technical concepts and troubleshooting steps, adapting guidance to different skill levels while using empathy, active listening, and clear communication to drive confident issue resolution.

**SOLUTION SPECIALIST | Deloitte | Jacksonville, FL | Remote** Sep 2020 – May 2025

*Consulted across complex federal and enterprise environments, leading and coordinating initiatives spanning program delivery, privacy, risk, reporting and stakeholder management.*

**Veterans Health Administration (VHA) | Oncology Modernization**

- Partnered with the Release Train Engineer (RTE) on Jira sprint planning across five Agile teams by creating and organizing issues, tracking work items, and maintaining sprint readiness.
- Supported a Lean Portfolio team across five Agile teams, improving executive visibility through standardized reporting, SharePoint organization, and deliverables tracking.
- Developed launch and training materials to improve stakeholder readiness, clarify platform changes, and support consistent adoption across the modernization program.

**Defense Manpower Data Center (DMDC)**

- Led the team’s onboarding for an Elastic platform upgrade, creating a centralized tracker to monitor required steps, access needs, completion status, and outstanding actions.
- Utilized ServiceNow to coordinate access requests across project and team leads, resolving dependencies and ensuring required approvals were completed for onboarding.
- Developed executive status decks for four project teams, consolidating milestones, risks, blockers, dependencies, and progress updates for leadership review.

**Meta**

- Triaged privacy incidents across three pod teams, utilizing internal tooling to route cases, assess severity, and ensure incidents reached the appropriate investigative owners.
- Led incident reviews involving access control failures, data loss, retention, and deletion issues, product launches, and other privacy-related events requiring cross-functional investigation.
- Presented incident cases to GDPR attorneys, then partnered with Meta Legal to track remediation actions, ownership, and progress through closure.

**DataVault | Deloitte Internal Data Marketplace**

- Led access provisioning for third party vendors and global Deloitte member firms, managing permissions required to upload datasets and platform materials while maintaining appropriate access controls.
- Partnered with Deloitte practitioners and Third-Party Risk Management (TPRM) to manage the data procurement lifecycle, contributing to approximately $3M in data sales.
- Developed marketing and training materials to increase platform awareness, educate practitioners on available data offerings, and simplify access to the marketplace.

**Additional Deloitte Engagements**

- Mentored professionals within Deloitte's strategy practice, providing career guidance, knowledge sharing, and onboarding support while helping colleagues navigate internal resources and project opportunities.
- Contributed to a federal Chief Data Officer (CDO) Council engagement, coordinating project activities and deliverables in support of cross-agency data and governance initiatives.

**CLIENT OPERATIONS SPECIALIST | First Citizens Bank | Jacksonville, FL** Jan 2020 – Sep 2020

- Resolved 600+ commercial title issues by researching account documentation, coordinating corrective actions, and maintaining accurate records across customer and third-party interactions.

**AUTO COLLECTIONS SPECIALIST | TD Bank | Jacksonville, FL |** May 2016 – Dec 2018

- Recovered approximately $25K per month while applying collection approaches aligned with consumer financial protection requirements and maintaining professional customer relationships.

## PROJECTS

**Cybersecurity Vulnerability Risk Intelligence Dashboard | Power BI**

- Designed an interactive risk dashboard integrating multiple public data sources to help users identify high-priority risks and focus remediation efforts using Power BI, Power Query, and DAX.

**Security & Privacy Incident Triage Simulator**

- Developed an interactive simulator covering 10 security and privacy scenarios, with severity criteria, escalation paths, and response guidance to demonstrate structured incident decision making.

**Hospital Financial Exposure Dashboard | Power BI**

- Created a Power BI dashboard using DAX to analyze admissions, visit costs, and insurance coverage, helping identify trends and areas of potential financial exposure.

**Enterprise IAM Access Provisioning & RBAC**

- Engineered an access provisioning simulator and RBAC matrix for internal, global, and third-party users, applying least privilege, data sovereignty, and segregation of duties principles.

## EDUCATION

**M.S.** | Information Technology, Cybersecurity Management | Florida Institute of Technology 2020
**MBA** | Business Administration and Management | Florida Atlantic University 2019
**B.S.** | Legal Studies | University of Central Florida 2013
