

BEATRICE KUNGU

TECHNICAL RISK | GRC | CYBERSECURITY COMPLIANCE

Jacksonville, FL | 904-514-3838 | bwanjiku2390@gmail.com | linkedin.com/in/beatricekungu

Portfolio: beatricekungu.github.io

PROFESSIONAL SUMMARY

Technical risk and GRC professional with 4+ years of experience helping federal and enterprise teams manage privacy incidents, identity and access controls, audit evidence, third-party risk, and data governance. Brings more than eight years across technology consulting and regulated financial services. Uses ServiceNow, Power BI, Azure SQL, RBAC, and NIST-aligned practices to translate technical findings into clear remediation actions and leadership decisions.

CORE EXPERTISE

Risk, Security & Governance: GRC, enterprise issue management, privacy incident response, root cause analysis, control assessment, NIST-aligned practices, data governance, regulatory compliance, third-party risk management

Identity, Data & Tools: IAM, RBAC, least privilege, segregation of duties, Azure SQL, SQL, Power BI, ServiceNow, Oracle Cloud, Dynamic Data Masking, audit evidence

Program & Implementation: Technical program management, Agile and SAFe delivery, requirements gathering, process improvement, change management, stakeholder facilitation, executive reporting, vendor management, SLA and KPI monitoring, SharePoint

PROFESSIONAL EXPERIENCE

Deloitte Consulting | Solution Specialist | 09/2020 - 05/2025

Veterans Health Administration (VHA) Engagement

- Tracked compliance and risk management deliverables across five Agile Release Trains, helping teams align with federal healthcare modernization requirements and NIST frameworks.
- Built a SharePoint governance hub that gave leaders one place to review audit evidence, compliance status, and outstanding actions.

Defense Manpower Data Center (DMDC) Engagement

- Built automated tracking workflows for identity and access onboarding, reducing the compliance check cycle from 20 days to fewer than seven for 150+ consultants.
- Managed ServiceNow access approval queues, identified missing documentation, and monitored tickets against SLAs.

Meta Engagement | Privacy Program Manager

- Managed 10-15 concurrent high-risk privacy incidents from intake and root cause analysis through closure approved by Legal.
- Turned technical findings from engineering teams into clear compliance reports that Legal used to assess risk and FTC reporting obligations.
- Facilitated reviews with Legal, engineering, and product teams to agree on remediation actions, owners, and regulatory exposure.

Deloitte Data Marketplace Platform | Project Manager

- Managed third-party privacy and compliance reviews for an enterprise data marketplace serving 60+ external vendors.
- Created data catalogs and platform guides that supported secure data purchasing across seven global member firms and \$3M in platform revenue.

PROFESSIONAL EXPERIENCE (CONTINUED)

First Citizens Bank | Client Operations Specialist | 01/2020 - 09/2020

- Resolved 600+ commercial title issues while meeting state DMV and lien documentation requirements.
- Reviewed title and lien records for accuracy, maintained complete case documentation, and coordinated with state agencies and internal teams to resolve exceptions.

TD Bank | Auto Collections Specialist | 05/2016 - 12/2018

- Recovered approximately \$25,000 per month using collection approaches that followed consumer financial protection requirements.
- As a member of the first cohort, trained and mentored new employees on payment options, account documentation, and repossession-prevention procedures.

TECHNICAL GRC & CYBERSECURITY PROJECTS

Azure SQL Dynamic Data Masking Proof of Concept

- Designed and tested an Azure SQL Dynamic Data Masking proof of concept for PII, PHI, and payment data. Compared privileged and restricted query results to document RBAC and least privilege controls.

Security & Privacy Incident Triage Simulator

- Created an interactive simulator covering 10 cybersecurity and privacy incidents, with severity criteria, escalation paths, and response guidance for cross-functional teams.

Hospital Financial Exposure Dashboard | Power BI

- Created a Power BI dashboard using DAX to analyze hospital admissions, visit costs, and insurance coverage, helping leaders identify areas of financial exposure.

Enterprise IAM Access Provisioning & RBAC

- Built an IAM access provisioning simulator and RBAC matrix covering internal, global, and third-party users, with controls for least privilege, data sovereignty, and segregation of duties.

EDUCATION

M.S., Information Technology - Cybersecurity Management | Florida Institute of Technology | 2020

MBA | Florida Atlantic University | 2019

B.S., Legal Studies | University of Central Florida | 2013
